Chairman Davis and Rep. Waxman write NFL Commissioner Paul Tagliabue to request additional information from the NFL on the league's steroid testing program. At an April 27, 2005, Committee hearing, the NFL announced changes to its performance-enhancing drug policy, including several that would make prohibitions against players taking testosterone more stringent. As a result of these changes, Chairman Davis and Rep. Waxman request additional information on the results of testosterone testing conducted by the NFL in recent years.
